Profile

A developer with a strong interest in projects that require both conceptual and analytical thinking. Fully-committed to designing and developing innovative web-based materials that users will love. Always eager to learn more tricks from anyone - regardless of the industry they're working in.

Skills

HTML/CSS/JS Gulp

Bootstrap Responsive Design

React Jasmine

jQuery Knockout.js

Git AJAX

RESTful API Gimp

Projects

Feed Reader Testing 03/2017

- Wrote comprehensive unit tests, using the Jasmine testing framework, for an RSS Feed Reader application that uses Google's RSS API.

Neighborhood Map 03/2017

- Built using the Knockout framework, that displays a Google Map of an area and various points of interest with the Yelp API

Classic Arcade Frogger 12/2016

- An HTML5 Canvas powered video game, developed using the best practices in Object Oriented JavaScript

Interactive Resume 12/2016

- Using jQuery, developed an interactive resume application that reads all data from a JSON file and then dynamically modifies the DOM to display the information. Utilized Bootstrap

Sample Portfolio 11/2016

- Developed a personal portfolio page using HTML, CSS, and the Bootstrap framework. The page is fully responsive and works on mobile, tablet, and desktop browsers.

Education

Front-end Web Developer Nanodegree 2016-2017
UDACITY

BA in Chinese, Minor in Business Admin 2008-2013
UNIVERSITY OF FLORIDA

Experience

Retail Sales Consultant, Sprint 2016-2017

- Retail Wireless Consultant and sales professional

Inter Analyst, Franklin Templeton 2014-2015

- Facilitated key business decisions by senior executives and portfolio managers by utilizing Tableau software to produce ad-hoc reports showing trends and patterns. Maximized utilization of Tableau by attending software conference in Warsaw, Poland, where new techniques and best practices were discussed among numerous Polish companies.
